Career Focus: Business & Quality Analysis, IT Intern, Project Management Intern, Software Development Intern
Junior Computer Science student skilled in C, C#, Java, Python, SQL, and SQLite with hands-on experience in Agile team environments. Interested in artificial intelligence, automation, and IT operations, with a focus on technological applications to simplify complex tasks and improve overall performance through practical and real-world solutions.

Education:

Bachelor of Science in Computer Science | AI Concentration | Minor in Business | GPA 3.57 *Expected May 2027*
Oakland University, Rochester, MI

Relevant Experience:

Software Development Intern | United Wholesale Mortgage, Pontiac, MI *May 2025-August 2025*

- Developed integration tests with Kafka and SQL Server Management Studio and added process documentation
- Refactored unit tests by replacing mocked data with real datasets to better simulate production-like behavior
- Built a reusable React UI component that improved the user experience for internal tools
- Developed ReROC, an intern operations analytics project that integrates internal APIs to help team members search past IT incidents by keywords enabling incident tracking and data retrieval

Summer Engineering Intern | WSP, Madison Heights, MI *July 2022-August 2022*

- Reviewed and assessed technical site plans to ensure data accuracy and project quality control
- Completed weekly deliverables and maintained progress documentation to support workflow organization
- Shadowed engineers to understand process coordination and project improvement in real-world operations

Course Projects:

OU Bookmarket | Java, Spring Boot, SQLite, React, TypeScript, Tailwind CSS

Collaborated with a team to develop APIs using Java Spring Boot and SQLite to manage user accounts, book listings, and listing comments for an interactive university platform. Designed and deployed a user interface with React, TypeScript, and Tailwind CSS for a smooth user experience.

Climatrak | Python, Flask

Co-developed a natural disaster tracking web app using data analytics and the OpenWeather API. Utilized the SCRUM Agile methodology and led the first sprint as Scrum Leader, promoting collaboration and resolving challenges with a solutions-oriented approach. Created data visualizations to effectively communicate climate trends and disaster patterns.

Technical Skills:

Programming Languages: C, C#, Java, Python, SQL, SQLite

Developer Tools & Applications: Bitbucket, Docker, Figma, GitHub, Google Suites, Jira, Microsoft 365, SQL Server Management Studio, Swagger, Visual Studio Code, Visual Studio

Certifications: Word, Excel, Python(University of Michigan)

Other Experience:

Hostess | Bravo, Rochester Hills, MI *October 2022-December 2024*

- Managed the floor plan according to guest arrivals and needs
- Escorted guests to their designated locations and assisted as needed

Activities & Achievements:

President, Business Professionals of America for Oakland University

Vice President, Alpha Lambda Delta National Honor Society

Co-Vice President, Women in Computing

Member, Society of Women Engineers

Gerus Computer Science Scholarship

1st Place - Team Project, Hack Dearborn 2024, University of Michigan
